

New Rolls, Rubberising, PU Coating, Chrome Plating, Repairing.,

Solution Inc., the Rolls Expert, is the on-time delivery and quality leader in the Industrial Rolls in India. Our sophisticated manufacturing facilities with state-of-the-art equipment and high-tech R & D and testing lab uses latest technology to provide high quality precision new custom rolls and variety of repair and maintenance services for any roll of any size and for any industry.

Engineering Services

- Fabrication of new Rolls
- Recoating
- Regrinding
- Cambering
- Grooving & Drilling
- Chrome Plating
- Repair/modernization of worn journals
- Replacement of broken journals
- Dynamic Balancing of rotating bodies
- Blind drilling

PU Coating

- Poly-urethane coating
- Well finished with micron accuracy
- Applicator Rolls
- Bridle and Deflector Rolls

Rolls for Steel and Allied Industries

- Fabrication of new Rolls
- Recoating
- Regrinding
- Replacement of worn journals
- Dynamic Balancing of rolls

Hard Chrome Plated Rolls and Plating Services

- Induction Hard Rolls
- Cordon (RA) Finish Rolls
- Mirror finished Rolls
- Mirror finished Rolls
- Grinding to highest accuracy level
- Build up of journals by Plating

***Solution* INC.**

Strengths of Poly-urethane

- More life as compared to rubber and other elastomer coatings.
- It has Better abrasion resistance, cut and tear resistance.
- Low Hysteresis, Less Heat Generation.
- More load bearing capacity.
- No variation in hardness over time.
- High resistance to various chemicals and solvents.
- High range of hardness : from 30 shore A to 80 shore D.

Strengths of our PU Plant

- One of the biggest setup in the country with latest technology.
- Fully automated three component French make machine.
- Capacity to cast up to 500 kg on a single roller in one go.
- Best quality raw material in collaboration with international suppliers.
- Facility to cast PU up to 2000mm dia and 8000mm length.
